

Class 2

Class 2 have been hard at work yet again this term! Everyone has had a great time learning all about animation and putting together their very own stop frame animation short film. The children learnt how much time and detail goes into their favourite cartoons and other types of animation. The children enjoyed modelling and creating backgrounds, title pages, props, scripts, clay characters, end credits and even came up with their own company names and logos.

We looked at traditional fairy tales in our literacy and everyone created their own version of Cinderella as they learnt how to structure stories using 'story mountains'.

Class 2 had 2 fantastic trips this term to support their learning in science about animals and their habitats. We all had a fantastic trip to The Deep where we had a lesson on the Arctic and Antarctic and we got see lost of different from the oceans, rivers, lakes, rainforest and also some Gentoo penguins. Our 2nd trip was to the Harrogate Show Ground to go pond dipping. The children found all sorts of under water creatures and also had chance to see what many of these creatures turn into as various dragon flies and damsel flies darted around our heads.

We have also been checking on our seeds and sunflowers that we planted in Spring....take a look in the garden area, some are now ell over 6 feet tall!

Have a fantastic summer!!!
